Access your favorite newsgroups without limits. **Unlimited bandwidth** and usage.

SSL Encryption

Every account comes with **50 SSL connections** to prevent snooping and throttling from ISPs. Security and privacy come standard.

Support

Manage account functions **easily** through the customer dashboard or contact us directly for help. Swift support and service, we want to make you happy.

Frequently Asked Questions (FAQ)

How is my contact email used?

We do not share your information and will use your email to contact you only as needed to provide our service. We hate spam as much as you do.

Where are the servers located?

Servers are distributed in the US, Netherlands, and Germany. The server address provided in the dashboard will automatically route you to the closest location. You also have the option of manually specifying which servers to use.

Is posting allowed?

Absolutely. It is not enabled by default on a new sign up to prevent spam, please request it through the dashboard and it will be added to your account.

Can I share my account?

Sorry, no. Our margins are thin and do not allow for shared accounts.

Does your retention grow?

Yes. We will update the posted number every few months but retention is constantly increasing.

Do you offer a free trial / What is your refund policy?

We provide a 7-day money back guarantee, please send a message through the dashboard and you will be refunded if not satisfied with the service. Normally, we bill monthly and generally do not offer pro-rated refunds for partial months.

What happens if my card is declined in a given month?

We will send you an email to let you know there is a problem and retry in a few days. In that time, you can update your payment details in the dashboard or if the failure was temporary just wait for it to go through automatically. If the same card fails for a consecutive time, we will suspend access and send you a notification.

Do you have compressed headers?

Yes, standard on all accounts.

Do you support IPv6?

Yes, the provided server address supports both IPv4 and IPv6 connections.

What can I do if my question is not answered here?

If you provide your email address in the sign up form above, a dashboard invite will be sent. From the dashboard you have access to support in the bottom right corner.

About Us

We are a tier-1 Usenet reseller intent on providing superior service with a low price.

Our focus is newsgroup access that is catered towards the technically savvy. Those that require all the features of a reliable, fast and secure Usenet provider without any add-ons or client bundles. By limiting support to billing inquiries and relying on our users to configure their own access through popular Usenet applications, we keep our costs low. These savings are passed on in the form of an all-in-one plan at a great price.

We have partnered with one of the oldest and most reliable Usenet providers to resell service in a simple package. No more worries about overages, long commitments, or paying for unused extras. Our margins are low but the quality is high. Receive the full feature set with SSL encrypted connections, industry leading retention, and unlimited speeds.

Newsgroup Ninja is committed to a simple monthly pricing model with an easy to use self-serve dashboard. Cancelling service is also a breeze and requires no support tickets or frustrating calls. Simply access your dashboard through the unique link for all account administration.

Our hope is that the reputation of reliable high quality service at a great price will encourage organic growth. We also take privacy and security seriously, employing best practices for encryption of data and utilizing only the best hosting providers. Please tell your friends to give us a try!
